

# PACNET INTERNET

<http://www.pacnet.com/>

"Pacnet is Asia's leading independent telecommunications service provider with the largest regional footprint and the region's most extensive sub-sea cable infrastructure. With presence in 14 countries, we are purpose-built to enable the world to connect Asia in transformational ways. To elegantly bridge the national, cultural, and technological barriers that can routinely sap your momentum and waste resources. To provide customers with an adaptive organization and infrastructure that delivers just the right mix of pan-Asian connectivity with reliability, value and efficiency.

We are now inviting great people to join our dynamic global workforce where you will be the foundation for realizing our vision."
